

Accessories for brushing machines

Brushes

Pressovac offers a large selection of high quality brushes of different forms, sizes, and bristle materials.

The brushes should be selected according to brushing equipment, duct size, and amount of dust in the duct. Brushes with standard bristles are appropriate for cleaning air ducts with thinner layer of dust. For more obstructed ones, we recommend to use brushes with hard bristles first.

Brush type	S-brush	L-brush	E-brush	V-brush
